

EVERSEAM®

THE NEXT GENERATION METAL ROOFING

Everseam® – Roof: Dark Gray

Advantages

- Thicker steel reduces the appearance of “oil-canning” and purlin see-through
- Greater snow and wind yields and hail resistance
- Concealed Fastener System
- Installation over an existing roof
- Energy Efficient

EVERSEAM®

Standard Specifications

- Structural Steel Grade 50 produced in conformance with ASTM792
- 50,000 PSI minimum yield
- Custom cut to the inch up to 40'
- Available in a wide variety of colors

Description

Attractive Design

The Everseam® panel has the elegant look of a traditional style standing seam roof, with the strength and durability of high strength 24-gauge steel. Our high-quality, pre-painted metal roof affords an attractive life cycle cost as they will not crack, shrink, or erode. This makes them a long lasting alternative to many conventional roofing materials. A homeowner is certain to achieve a designer look from our wide selection of styles and colors, creating an aesthetically pleasing appearance that will have a positive influence on re-sale.

Superior Strength

Everseam® is 20" (+/- 1/4") wide with a 1 1/2" high seam. The integral locking seam is held in place by concealed metal clips, and is installed over a waterproof solid substrate. The absence of exposed fasteners and the weather-tight side lap, allow for applications on roof pitches as low as a 3:12. Everseam®'s durability and aesthetic appearance make an ideal choice for residential roofing applications.

SERIES	24 Gauge
SUBSTRATE	Galvalume / Galvanized
FINISH	Fluropon® / Illumipon®
FILM INTEGRITY	35 Years
FADE / CHALK	35 Years
PERFORMANCE	UP TO 25 Years
